

Your sponsorship makes our mission possible!

Since 1987 Habitat has built over **330 homes** in Dane County and strengthened neighborhoods in **18 Dane County Communities**. Habitat helps families achieve homeownership throughout Dane county, partnering with more than **570 families** to date.

Habitat does more than just build homes; we build homes, community and hope. With the help of our corporate partners, donors, and volunteers, we are working to ensure everyone has a safe and affordable place to live.

2024 Women's Leadership Build

Friday, April 26, 2024

Location: 769 Janesville St, Oregon, WI

The Women's Leadership Build Day provides the opportunity for **20+ area women** to address the growing housing crisis in a very real way. Since 1991, women leaders from across Dane County come together to build safe, affordable homes alongside a partner family. Our goal: women supporting women!

Target Audience

This dedicated event brings together women who are leaders in their workplace, municipalities, and community.

In partnership with sponsors and donations from participants, the Women's Leadership Build Day aims to raise \$10,000 to support Habitat's mission while connecting women in our community.

NEW!

Women's Work Days

Habitat is launching a brand-new volunteer opportunity to engage, encourage and inspire women—Women's Work Days! These dedicated days take place quarterly and provide women with hands-on opportunities to build their construction skills and learn first-hand about homebuilding. With your partnership, at least **80 women** volunteers will see firsthand how their hard work is making a huge difference to our neighbors in need.

Upcoming Women's Work Day: January 6, 2024

Women make up 46.6% of the total workforce in the U.S., but in the construction industry, the statistics are drastically different. Of all construction workers, the Bureau of Labor Statistics reported that 10.9% of them are women. So, for every 10 people in a construction-related role, one of them is a woman (U.S. Bureau of Labor Statistics, 2020).
With your partnership, we can do our part to close the gender-gap for women in construction.
